RAPIDCONNECT TUB DRAIN INSTALLATION

BEFORE YOU BEGIN
We recommend consulting a professional if you are unfamiliar with installing plumbing fixtures. Signature Hardware accepts no liability for any damage to the floor, drain, tub, or for personal injury during installation. Observe all local plumbing and building codes. Unpack and inspect the faucet for shipping damage. If any damage is found, contact our Customer Relations team at 1-866-855-2284.

GETTING STARTED
• Ensure that you have gathered all the required materials that are needed for the installation.

TOOLS AND MATERIALS:
- Long-nose Pliers
- 1-3/4" Screws (x5)
- Drill
- Lubricant (provided)

Installation
1. Use the provided sub-floor cutout template to cut a 5” diameter hole into the wood sub-floor, centered above the prepared P-Trap.

2. Connect the drain assembly to the prepared P-Trap below the floor. Secure the drain to the sub-floor with 5 screws (not supplied).
3. Complete the installation of the finished floor, leaving a 2.5" opening to access the drain.

4. Remove the plug from the drain using long-nose pliers. The plug may need to be rocked back and forth to loosen from the drain. Do not twist, which can loosen the entire drain assembly.

5. Apply the provided lubricant to the tailpiece of the tub drain. Lower the tub into position and insert the tailpiece into the Rapid Connect drain assembly. Press firmly into place to ensure that a tight seal is made.
